Sunrise Telecom available in NZ through Maser

Winter Edition 2010

As per 1st June 2010, Maser Technology Group is the exclusive distributor for Sunrise Telecom in New Zealand, Australia and Pacific Islands.

Sunrise Telecom

Sunrise Telecom is a provider of test and measurement solutions for telecom, wireless and cable networks. Maser Technology Group has successfully represented Sunrise Telecom in Australia for over 10 years and sold their test equipments to all main carriers and installers.

Contact Maser Technology Group in New Zealand on Toll free number 0800 663 7825 or email sunrisesales@maser.co.nz to discuss your specific requirements.

Definitive Tool for Carrier 10 Gigabit Ethernet and IP

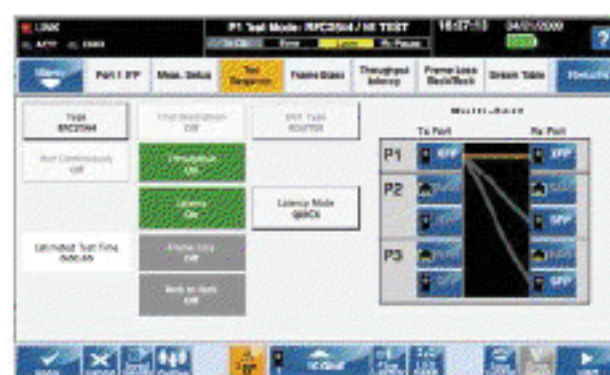

The XTT 5000 delivers the industry's most compact and powerful 10 Gigabit Ethernet multifunction tester for the installation and maintenance of carrier-grade Ethernet and Internet Protocol (IP) services.

The XTT 5000 performs simultaneous and independent tests at full line rate over its three test ports for 10/100M, Gigabit and 10 Gigabit Ethernet. Its advanced features include traffic generation at up to layer 4, including stacked VLAN (Q-in-Q) and MPLS.

The packet-technology-specific user interface optimises testing time and minimises test configuration and training time.

"Top tier communications service providers are severely constrained by dwindling budgets, yet their customers demand state-of-the-art services and performance," said Bahaa Moukadam, Sunrise Telecom's Vice President Marketing. "The XTT 5000 provides comprehensive Carrier Ethernet services testing in a compact, highly usable package."

GigE Module shortens installations & troubleshooting Ethernet services

This highly anticipated module meets the urgent need for cost and time savings in business Ethernet service verification.

The handheld, dual-port, dual-media module helps technicians of all levels validate service level agreements, verify traffic prioritisation and decrease mean time to repair by quickly isolating problems.

A tier 1 European broadband carrier recently commented that for them to maintain their leadership, it is of important to ensure fast deployment and unmatched QoS, which is why they rely on Sunrise Telecom's MTT - and now the GigE Module.

Maser Technology Group's product portfolio

Maser initially started in New Zealand over 27 years ago. With offices in Auckland and Wellington, our sales and technical support team look forward to assisting you with your requirements.

In addition to Sunrise Telecom, Maser New Zealand's portfolio of products includes drive test tools from Anite Nemo and active End-to-End service quality testing including Roaming test system from Keynote Sigos. Maser also represents Kathrein and has successfully sold base station antennas for mobile communication into New Zealand.
